Water

In an effort to reduce waste (as there is no/limited recycling on the islands) and preserve the fragile marine environment, your yacht is fitted with a high technology water maker. The technology is remarkable and has been tested to produce better quality water than from the taps in most homes and equivalent or better in purity to bottled water. Are you willing to drink the water on the yacht?

- Yes
- No

ENJOY YOUR LUXURY YACHT CHARTER VACATION!

Yacht Charter Industry Going Green to Save the Blue

The yacht charter industry is committed to preserving the natural beauty and environmental health of the oceans and islands where we sail. CYBA – Charter Yacht Brokers Association International has created a “Going Green” initiative to reduce the environmental impact of the charter yacht industry.

Why Is This An Important Issue?

Unfortunately, most of the Caribbean islands have limited or no recycling options – everything goes into landfills. An average sized charter yacht generates about 200-400 plastic bottles of trash each week. Using very loose math, that’s at least one million bottles a year in the BVI landfill alone and just from crewed yachts. We all know that 200 years from now, those plastic bottles will still be there. Plus the amount of money to make those bottles and ship them to the islands leaves a large carbon footprint on the planet.

What Is the Alternative? Our yachts are fully capable of providing pure, filtered water made by their water makers. If charter guests are willing to drink the yachts’ “tap water”, we can minimize the waste accumulating on these precious islands.

What Can You Do? Drink the yachts’ water. The crew will provide you with re-usable water bottles or glasses. Try it – you’ll like it. And if you don’t, they will be happy to purchase bottled water for you.
